**Acrowire Signs Lease for Larger Office Accommodations in UNCC's Ventureprise PORTAL Building**

*Move Spurred by Increase in Business and Employees*

**Charlotte, N. C. (Jan. 8, 2014)** – Acrowire, a strategic business and legal technology consulting company, today announced that it has signed an agreement to lease office space in the prominent [Ventureprise](#) PORTAL building in Charlotte, N.C.

The move, scheduled for the summer of 2014, will give the company the space it needs to accommodate its business growth and additional employee head count on a long-term basis.

The nonprofit Ventureprise connects entrepreneurs, community resources, university researchers and funding partners to stimulate growth and promote investment in businesses leveraging technology. Its PORTAL Building on the UNCC campus is slated to open in early 2014 and represents an innovation-focused commercial environment for large corporations, entrepreneurial ventures and academia.

“Acrowire has grown significantly in the past year due to new clients seeking to enhance critical business processes and the technology that supports them,” said Ted Theodoropoulos, president of Acrowire. “Ventureprise, with its emphasis on innovation and entrepreneurship, offers the ideal accommodations for our new, expanded headquarters.”

In 2013, Acrowire acquired 10 clients, launched a new website and blog and qualified for the Microsoft Cloud Accelerate program. The company continues to focus on attracting and retaining top talent as employees will have direct access to networking and learning opportunities provided in its new location.

Acrowire was founded by Theodoropoulos, a former Microsoft product specialist and senior vice president of Bank of America focused on corporate auditing, consumer risk management and global anti-money laundering initiatives. An advocate of Six Sigma, his Green Belt work led to a U.S. patent and the 2007 Best of Six Sigma Award. Today, he and the Acrowire team work together to help businesses and legal organizations utilize technology to improve business performance and profitability.
